SUMMARY

Analytical and detail-oriented data science graduate student with experience in business intelligence, dashboard development, reporting automation, and trend analysis using Power BI, SQL, Excel, and Python. Skilled in translating structured and unstructured data into actionable insights through KPI reporting, data visualization, financial analysis, and stakeholder-focused storytelling.

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis & Visualization: Power BI (DAX), Pandas, NumPy, Matplotlib, Seaborn

Analytics & Reporting: KPI Development, Dashboard Design, Data Storytelling, Trend Analysis, Business Intelligence

Tools & Technologies: Power BI, Tableau, Power Query, Excel, Git, GitHub, VS Code

PROJECTS

AI Job Market Dashboard | Live Dashboard

Jan 2026

- Analyzed job market datasets to identify salary trends, skill demand, and hiring patterns across roles and regions.
- Built end-to-end pipelines using Python (Pandas), SQL, and Power Query, and developed Power BI dashboards with DAX for operational reporting, performance tracking, and multi-dimensional trend analysis.
- Identified 15–22% salary variation across roles and regions and translated findings into actionable insights through business-focused data storytelling and reporting.

Student Cost of Living Dashboard | Live Dashboard

May 2026

- Evaluated affordability trends and monthly student living costs in East Lansing by comparing expense patterns across 2024 and 2025 and projecting 2026 inflation-driven changes.
- Collected and structured local pricing data from Zillow, ForRentUniversity, Walmart, Target, Kroger, Aldi, and Meijer, and incorporated CPI-based inflation references from the U.S. Bureau of Labor Statistics (BLS).
- Built an interactive Power BI dashboard with KPI cards, category-wise expense analysis, affordability comparisons, and projected cost trends while analyzing how rising living costs may contribute to increasingly price-sensitive spending behavior.

Smart Resume Analyzer | Live App

Aug 2025

- Analyzed resume datasets to evaluate candidate-role alignment, identify recurring skill distribution patterns, and assess gaps between candidate qualifications and job requirements across roles.
- Processed unstructured resume data using Python and spaCy to extract skills, structure candidate information, and support role-fit analysis through automated text processing and data organization.
- Identified recurring skill gaps and inefficiencies in candidate-role alignment and communicated analytical findings to support improved screening, recruitment insights, and decision-making processes.

Analytic Showdown 3.0 – Data Analysis Challenge

Feb 2025

- Analyzed and cleaned structured datasets under time constraints as part of a competitive analytics challenge conducted by the Know-I Club at Sri Venkateswara College of Engineering.
- Performed exploratory data analysis, identified trends and inconsistencies in the dataset, and developed interactive Power BI visualizations to communicate insights effectively.
- Shortlisted among top finalist teams by translating raw data into clear analytical findings and dashboard-driven business insights.

ACHIEVEMENTS

- Smart Resume Analyzer project received Best Paper Award at NCSPCN 2025 and secured Second Place at Invictus'25 National Paper Presentation for its analytics-driven approach to candidate-role matching and skill gap analysis.

EDUCATION

Michigan State University

Master of Science in Data Science GPA: 3.9/4.0

- Relevant Coursework: Data Mining, Big Data Analysis, Statistical Modeling

Aug. 2025 – May 2027

East Lansing, Michigan

Sri Venkateswara College of Engineering

B.E. in Computer Science and Engineering GPA: 7.5/10

Oct. 2021 – Jun. 2025

Sriperumbudur, Tamil Nadu
